

HensonPro

5000

Field Analyser

Tinsley medical instruments

Designed by **ophthalmic professionals**

for use by ophthalmic professionals

**The Henson Pro and
it's dedicated furniture
have been designed
with space saving
in mind and can be
customised to fit
into any practice.**

The design and development of the Henson Pro 5000 was based on the experiences and feedback from hundreds of existing Henson users. The clinically proven compact Bowl design permits full field screening with a small physical size.

The Pro 5000 operates from either a Laptop, Personal Computer or the custom made Mini-pc with an intuitive touch screen. The Henson Pro software is the latest development of what is already acknowledged as being one of the world's leading visual fields packages.

Whatever your visual fields requirements, from simple routine screening to long term visual field loss monitoring, the quality and performance of the Henson Pro 5000 has been designed to cater for all your testing needs.
